**Happy Holidays!**

Holiday Homework - Science

Class VII

- Take a fresh slice of bread and keep it in a glass plate in a warm dark place. Observe it after two to three days. Record your observations.  
What do you conclude from it?
- Take a potted plant with broad leaves and keep it in a dark place for one to two days. Take two similar strips of stiff black paper or cardboard. Cover both sides of a portion of leaf with these strips. Keep the plant in sunlight. After nearly 7 hours pluck the leaf. Remove the covered paper. What do you observe? What do you conclude?
- Collect pictures of different kinds of animals that give us wool.

- Acid rain is a phenomenon that causes damage to soil and monuments. Find out more about acid rain occurrences. What are its harmful effects?
- Take two similar tin cans. Paint one black and other white. Fill them with equal quantity of water. Keep the two vessels in midday sun for about half an hour. Now measure the temperature of the water in each of them. Which water is warmer? Why?
