

ENGLISH ASSIGNMENT

SESSION: 2025-26

Class-IV

Section- A (Reading)

Attempt all the questions.

Q1. Read the following passage carefully and answer the questions that follow.

Humming birds are the tiniest and most fascinating creations of nature. Hardly measuring more than your palm size, these tiny birds are a storehouse of immense power and energy. These tiny, little birds can fly great distances without stopping even once due to immense power.

Humming birds are found only in North America and South America.

They are immensely colourful. The male humming birds are more colourful than female. They have no sense of smell. Their beaks are long. They feed through long, tube-like tongues. They have very weak feet and use them just for perching. They feed mainly on nectar from flowers and also on tiny insects. They get their name from the fact that when they beat their wings, it produces a humming sound, like that of bees.

An amazing fact about humming birds is that they can rotate their wings in a circle, allowing them to be the only birds which can fly up, down, forwards, backwards, and even upside down. They can even fly short distances upside down, a trick which they use when being attacked by another bird.

1. Why are they called the storehouse of immense power?

2. Where are humming birds found?

- a) Europe and Asia ()
- b) Africa and Australia ()
- c) North America and South America ()
- d) Antarctica only ()
